

Women of Haiti

Haitian Baptist Convention

The Haitian Baptist Convention had the project to organize women's department: have all the women within the convention in one women's association and integrate them in the church activities. This was officially decided in their annual general assembly of June 1998. But they did not know how to go about and did not have somebody to do it. The general secretary with the executive committee of the CBH asked me to help them realize their dream.

We started the first phase of motivation with the general secretary, Pastor Emmanuel Pierre, going all over the country to visit and sensitize all our church members until the women's association was founded in December 2000. Since then, missionary Kihomi has been in charge of women's ministry in the CBH as the National Coordinator.

The women's ministries provide the following programs:

- Leadership training
- Teaching – nutrition & family health subjects; family planning, diarrhea, AIDS, blood pressure...)
- Teaching about small self-supporting economic projects (sewing, gardening, raise chicken or goat,...)
- Started the women's training & conference center project
- Social Ministry: Assist pregnant women, women who have delivered, sick people, give them: clothes, baby clothes, toilet items, financial assistance if we can.
